PROFILE

Currently holding a Master's degree from EPITECH Strasbourg. Curious and motivated, with a strong interest in mobile development and embedded software. Open to various full-time software engineering opportunities.

SOFT SKILLS

- Communication
- Creativity
- Problem Solving
- Adaptability

TECHNICAL SKILLS (SELECTION)

- **Linux (Arch and Debian)**
- **C / C++**
- **JavaScript / TypeScript**
- **Python**
- **Docker & Containerization**
- **Functional:** Haskell, Rust
- **Cloud:** AWS, GCP, Firebase
- **Web:** NodeJS, ReactJS, VueJS, NuxtJS, AngularJS
- **Mobile:** React Native, Flutter

PERSONAL PROJECTS

Embedded Systems - Stabilized quadcopter

Robotics - Motorized robotic arm controlled through a mobile application

Web / Mobile - Marketplace application for real estate sales

LANGUAGES

French - Native speaker

English - TOEIC: 860

German - KMK: A2

EXPERIENCE

11/25 - 05/26

Co-Founder & Software Engineer

Cbienlà.fr

Co-founder, architect, and web/mobile developer of cbienla.fr, a modern platform dedicated to real estate listing and property management. Designed the technical architecture, developed the mobile application in Flutter, and built the web platform using Nuxt.js with Firebase for backend services and cloud infrastructure.

NuxtJS / NodeJS / Firebase / Flutter

09/24 - 08/25

Software Engineering Consultant

Nagarro

Developed experimental SAP CAP applications and implemented SAP solutions for clients. Designed and deployed fully customized NodeJS systems tailored to specific business needs, combining technical development with client support and consulting.

SAP BTP / NodeJS / Grafana / Docker / Embedded Systems

10/23 - 03/25

Mobile Team Lead

Facix

Led the design, development, and supervision of the mobile team for the Facix application, delivering a scalable and high-quality solution. Startup created alongside my studies at EPITECH Strasbourg.

Flutter / Dart / AWS / NodeJS

04/23 - 09/23

Internship - Educational Mentor

EPITECH

Supported and supervised a class of first-year students in web development. Provided technical mentoring, structured learning paths, and helped students develop autonomy in problem-solving.

NodeJS / PHP / VueJS / ReactJS / Linux

07/21 - 01/22

Internship - QA Developer

ALE Enterprise

Developed automated tests for phones and generated detailed testing reports. Designed and implemented a new Python testing framework to improve efficiency and coverage. Developed a NodeJS application for VLAN configuration management at the company's new site. Quickly adapted to the team's Scrum methodology.

Python / NodeJS / AngularJS / Linux

EDUCATION

2020 – 2025

Master's Degree in Computer Science: Software Engineering Expert

EPITECH Strasbourg

Self-driven learning in programming, advanced Unix systems usage, development of problem-solving abilities, rigor, teamwork, organization, and presentation skills. **GPA: 3.14 / 4**

C / C++ / Haskell / Linux / NodeJS / Flutter

2023 – 2024

Master of Software Technology

HFT Stuttgart

Erasmus experience, two semesters of the Master of Software Technology focused on software architecture at HFT Stuttgart.

Java / Linux - macOS
